 - 7 Clinical Lead/Coordinator
 - 6 Counsellor
 - 2 Manager
 - 3 Team leader
 - 5 Workers
 - 5 Other: Health Clinician, SHC, Sr SA worker.

Evaluation Outcomes

- 71% of respondents stated their understanding of prevalence reports of strangulation and suffocation of children in NSW was now good or very good

- 77% of respondents stated their understanding possible outcomes of SHC Group Supervision and the importance of embedding health processes was now good or very good

- 74% of respondents stated their understanding of Forensic and Medical decisions and the Health response in JCPRP crisis presentations was now good or very good

- 68% of respondents stated their understanding of how to use the VAN Statistics Resource in the JCPRP Health role was now good or very good

Forum Highlights: "Presentations on strangulation by Rosemary and on Forensic medical decisions by Dr Dimitra" "Valuable presentation with comprehensive information for JCPRP Health staff"

Ideas for improvement:

- ❖ More time for JCPRP business session, best to have this earlier in the day

Future topics:

- ❖ Practice examples of things that have not worked well and how to reflect / learn more
- ❖ More opportunity to talk about what goes well at JCPRP – discussion of complex cases with good outcomes.

Participant feedback:

- ❖ "Great mix of policy, data, clinical work and support processes. Well organised."
- ❖ "Should be mandatory for us to attend. Such an important forum especially for sole/rural practitioners. Very important forum for skill/knowledge development! Policy update, trends, state information etc. "
